

README

Warning :

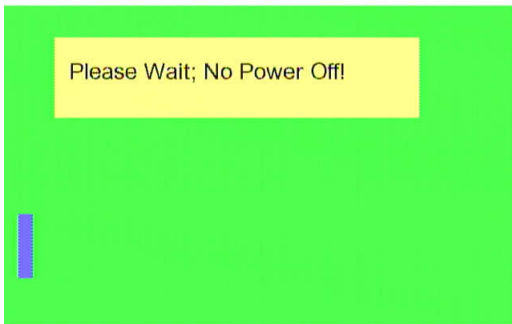

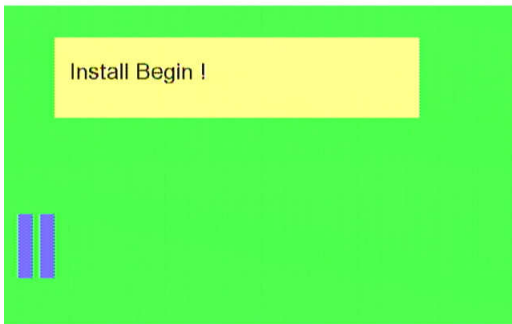

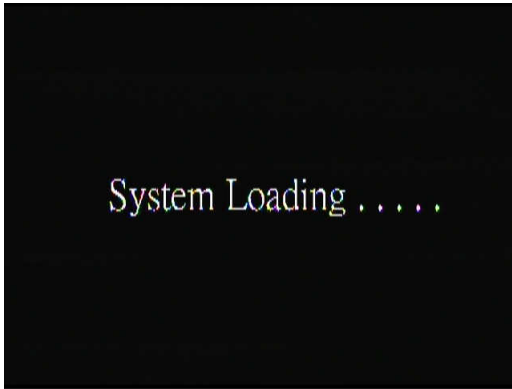

All data in the HDD will be erased after F/W update, please transfer all recorded media to Multi Media Disk(FAT32 partition) and back up whole Multi Media Disk through USB connection.

Firmware Update procedure

1. Unzip downloaded firmware to a USB flash drive. (Make sure unzipped files are all saved at root directory)
2. Unplug power cord of MR1 and then plug in USB flash drive to MR1's USB port.
3. Plug in power cord back and press MENU button immediately for at least 5 seconds, MR1's LED is in red and flash drive shows sign of

reading.

4. System Loading screen will show up first, and then Install Begin !

5. Wait until Install Completed, system will restart automatically.

Note : 50% of the HDD capacity will be partitioned into 5 UDFs for recording space, firmware & buffering, but no exceeds 250GB, others will be Multi Media disk(FAT32).
